Just a heads up on a request from Scott Mandirola is reaching out directly to ORD for assistance. The request then went to HQ and now back out to us. We can work directly with HQ but want to loop you in for any conversations that you may have had. Thanks. Kate

Kate,

Here's the message I received from OW this morning regarding the WV contact with ORD that we discussed. And attached is the e-mail chain that Rick forwarded to me which has additional info. Marcus would like to discuss, but if there is information from the 16th floor, I'd like to know before we contact him. Please advise.

Thanks,
Brian

Brian,

See the string of emails below. Looks like WV want to move faster than OST can, and has reached out to ORD. Let's discuss when you have a chance.

Subject: Pressing matter- Need your help FW: NC Science Advisory Board letter

Marcus,

SEE the string of emails below.

WV permitting is going directly to ORD to get their help in developing an effluent limitation for GENx. This is a problem. As you know, EPA is currently working on developing tox values for GENx. We need to let that process play out first. Please work with Region 3 to get WV permitting to slow down until after JUN.

CALL me to discuss further if you want the full story.

Thanks

-Deborah

Deborah,

We met with WV and region 3 a few weeks ago to discuss what toxicity data are available for GenX, and how we engaged with North Carolina to share that information. We encouraged region 3 to discuss the issue with region 4.

It appears that now WV is reaching out to ORD for assistance. Because we are doing the GenX assessment, and this is inherently a permitting issue not a research issue, ORD circled around to us.

Do you know if OWM has engaged in this conversation. It would seem that they should have the best advice for WV on how to address this permitting issue at this time. Can you help ?

Betsy

Yes. You should contact both Tala Henry in OPPT (cc Tracy Behrsing as backup) and Betsy Behl in OW/OST (cc Jamie Strong as backup).
These folks have been working with NC and are working on EPA's own analysis.

Andy and Lynn,
Do you know of anyone in EPA involved with this issue? I have an email in to Becky Allenbach in R4.
WV needs to move fast on decisions of their own regarding Washington Works

Chris,

I wanted to touch base with you briefly to try to get an idea on EPA's progress in validating reviewing NC's C3 limit of 0.170ppb. WV is in the process of reissuing the Chemours Washington Works permit and are including both limits for C3 and C8. The company is claiming that the science behind the NC number of 0.140 for C3 is bad and we are hoping to get some input from the EPA if possible.

Thanks
Scott
